Washington, D. C.
February 24, 1966

Dear Gene;

I have your welcome note of 3 February at last and its earnest invitation to visit [redacted] soon. [redacted] and I have started planning again, and with his good counsel, we are tentatively focused on the week of 24 April. Bill feels that this will get us past the Easter leave-taking, and I should be grateful for your opinion. Also I should like any ideas you may have on people to see or not to see there at that time. There is an outside chance that Nancy will come with me, but that is no better a bet than it has been in the past.

Sincerely,

STATINTL
